

TVR 101

Body-off restoration

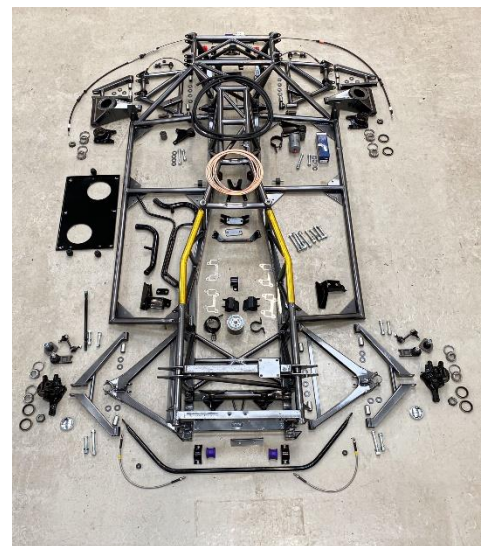

We are the TVR rebuild and body-off specialists!

Your TVR is unique and at TVR101 we will treat it that way. A body-off chassis refurb with new outriggers costs as little as **£9,499 + VAT** but we can tailor the cost to the work required. Many of our customers also opt for re-trim's and re-spays at the same time and we can be completely flexible.

Come and have a chat with us at the workshop, look at our current and past work, and enjoy a good cup of tea!

Body-off work includes labour and ancillaries, bearings, hoses, mounts, fuel and brake lines etc. The chassis is blasted, repaired, primed and powder coated. Originality is preserved where possible to retain the cars integrity. The rebuild will be fully documented on a memory stick for the history file of your car.

Cerebra, Sagaris, T350 and Tuscan cost + **£999**

Unit 1 Halfway Farm, Dockenfield Road, Bucks Horn Oak

TVR 101

Outrigger Replacement

Avoid the rust nightmares!

Your TVR is unique and at TVR101 we will treat it that way. Outriggers are an essential part of a TVR, they are structural and not just an MOT failure problem! If the rest of your chassis is in good condition outriggers can be perfectly welded in place without the body being removed. Outrigger replacement costs **£1840 + VAT**

We've see plenty of horror stories in our time! Sadly incomplete tack welding and poor fitting tubes are a common sight.

New chassis bolts are used on all outrigger replacement work and the chassis is thoroughly cleaned and prepped before customer collection.

Do it properly!
